Available to start immediately · Open to **full-time internship (five days a week)** · **Three months or longer** internship · Accepting **nationwide** internships.

Education

B.S. in Computer Science at **Communication University of China**, Beijing, China Sep, 2023 – Jun, 2027 (expected graduation)
Minor in Mathematics, GPA 3.72/4.00, selected courses: Advanced Calculus, Probability and Statistics, Linear Algebra, Web Frontend Development, Computer Networks, Computer Organization

Skills

- Familiar with HTML5, CSS3, and JavaScript, and have experience with TypeScript.
 - Experience with CSS preprocessors like Sass/Less and popular CSS frameworks such as Tailwind CSS
 - Familiar with React, Redux (including Redux Toolkit), React Router, and state management solutions.
 - Familiar with build tools like Vite, Webpack, and package managers such as npm or pnpm, and support code splitting and performance optimization.
 - Proficient in using Git for version control and collaborating on projects through platforms like GitHub/GitLab.
 - Familiar with front-end testing tools like Jest/Vitest, and proficient in using browser developer tools for debugging.
 - Understand the basics of computer networks, including the HTTP/HTTPS protocols, RESTful APIs, TCP connections, and DNS resolution.
 - Basic knowledge of backend development using Node.js and Express, and experience with databases like MongoDB and PostgreSQL.
 - CET-4 score of 539 and CET-6 score of 561. Regularly read English books and can proficiently read English documents and materials, and can communicate in daily and work-related conversations.

Related Projects

Personal Blog System

🌐 <https://liuhongwei.org>, 🐙 [Liu-Hong-Wei/Blog](https://github.com/Liu-Hong-Wei/Blog)

Tech Stack: React, TypeScript, Vite, Django REST

- Developed a modern, responsive **Single Page Application (SPA)** frontend for a personal blog using **React**, **TypeScript**, and **Vite**.
- Implemented a **component-based architecture** with features like post lists, detailed post views, and author profiles.
- Integrated with a **Django REST** backend to fetch and display blog content, including posts, tags, and user information.
- Implemented client-side rendering of **Markdown to HTML**, with **syntax highlighting** for code blocks.
- Enhanced user experience with features like **dark mode**, **lazy loading** for images and components, and client-side caching strategies using **custom hooks** (useLocalStorage, useLazyLoading).
- Planned and designed advanced features including **full-text search**, **internationalization (i18n)** for multi-language support, and a customizable **theming engine**.
- Architected for scalability and performance, with plans for **Progressive Web App (PWA)** capabilities for offline access and optimized **bundle splitting** for faster load times.

AI Resume Analysis System

🐙 [Liu-Hong-Wei/resume-analysis](https://github.com/Liu-Hong-Wei/resume-analysis)

Tech Stack: React, Vite, Tailwind CSS, DaisyUI, SSE (Server-Sent Events), Coze API

- Architected and developed a real-time, streaming AI chat interface using **React** and **Server-Sent Events (SSE)** for an interactive resume analysis experience.
- Created a custom hook (useChat) to manage the entire lifecycle of AI conversations, including message state, streaming content, loading indicators, and error handling.
- Implemented a component-based architecture featuring a modular ChatInterface that renders streaming AI responses, providing users with immediate feedback.
- Integrated with a **Coze API** backend, processing SSE streams to display AI-generated analysis, suggestions, and mock interview questions dynamically.

- Ensured a robust user experience by implementing intelligent error handling and automatic retry mechanisms for API communication within the useChat hook.
 - Developed a responsive and intuitive UI with **Tailwind CSS** and **DaisyUI**, including components for file uploads, conversation history (ChatList), and analysis type selection.
-

Motivation

- Strong passion for front-end development, with a habit of continuously reading technical blogs, eager to learn and apply new technologies quickly in practice.
- Possess good stress resistance and physical fitness, love running (half marathon time: 1:41), and have good time management and task prioritization skills.
- Enthusiastic about exploring new technologies, actively learning cutting-edge front-end knowledge and reading technical blogs to continuously improve development skills and innovative thinking.
